DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tarbox (US 6,154,732) in view of Walker et al (hereinafter "Walker", US 5,794,207).

Tarbox discloses all a method/system claims related to electronically selling information (investment advise) to a buyer (investor), the wherein the method/system comprises receiving an offer (fee(s)) for the information including at least one contingency from the buyer; providing the information in response to the offer; and receiving a first payment for the information if at least one condition for the contingency is satisfied after the information has been provided to the buyer (see col.3, ll. 21+; col. 2, ll. 4-46). Tarbox fails to disclose sending a counteroffer to the buyer based on the offer, however, this feature disclosed by Walker (see at least col. 9, ll. 4-51). It would have been obvious for an artisan at the time of the invention of Tarbox to integrate the counteroffer feature, as disclosed in Walker, because an artisan at the time of the invention of Tarbox would have recognized that the ability to counteroffer would allow the system to make recommendations that cater to participants

1 financial needs based upon available portfolio and/or allocation adjustments and the fees
2 associated with the execution and creation of the available portfolio and/or allocation
3 adjustments. Thus to allow the system to interactively adjust and negotiate through the
4 participants risk tolerances within the limitations of available resources would have constituted
5 an obvious expedient well within the ordinary skill in the art.
